

# hoops&yoyo Pyramid

# Gift Box

*print it, cut it, glue it, fill it...*

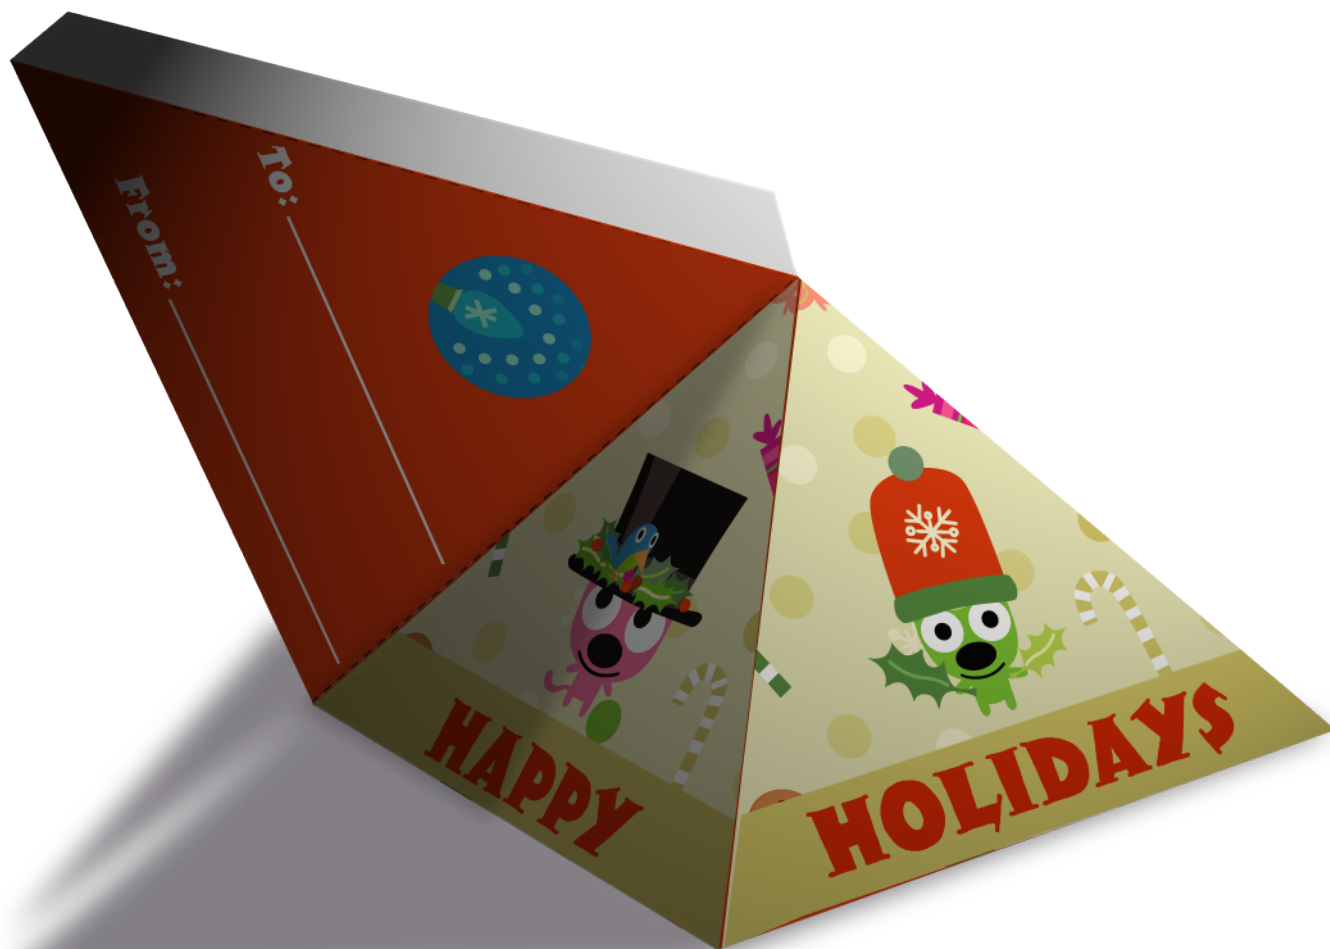

## Instructions:

1. Print out box.
2. Sign "To" and "From" areas.
3. Cut out box.
4. Fold box on dotted lines.
5. Glue bottom tab to inside of box.
6. Insert side tab from the "To and From" side on the opposite fold to close and seal the box. You can either glue, or simply insert the tab.

## Tips:

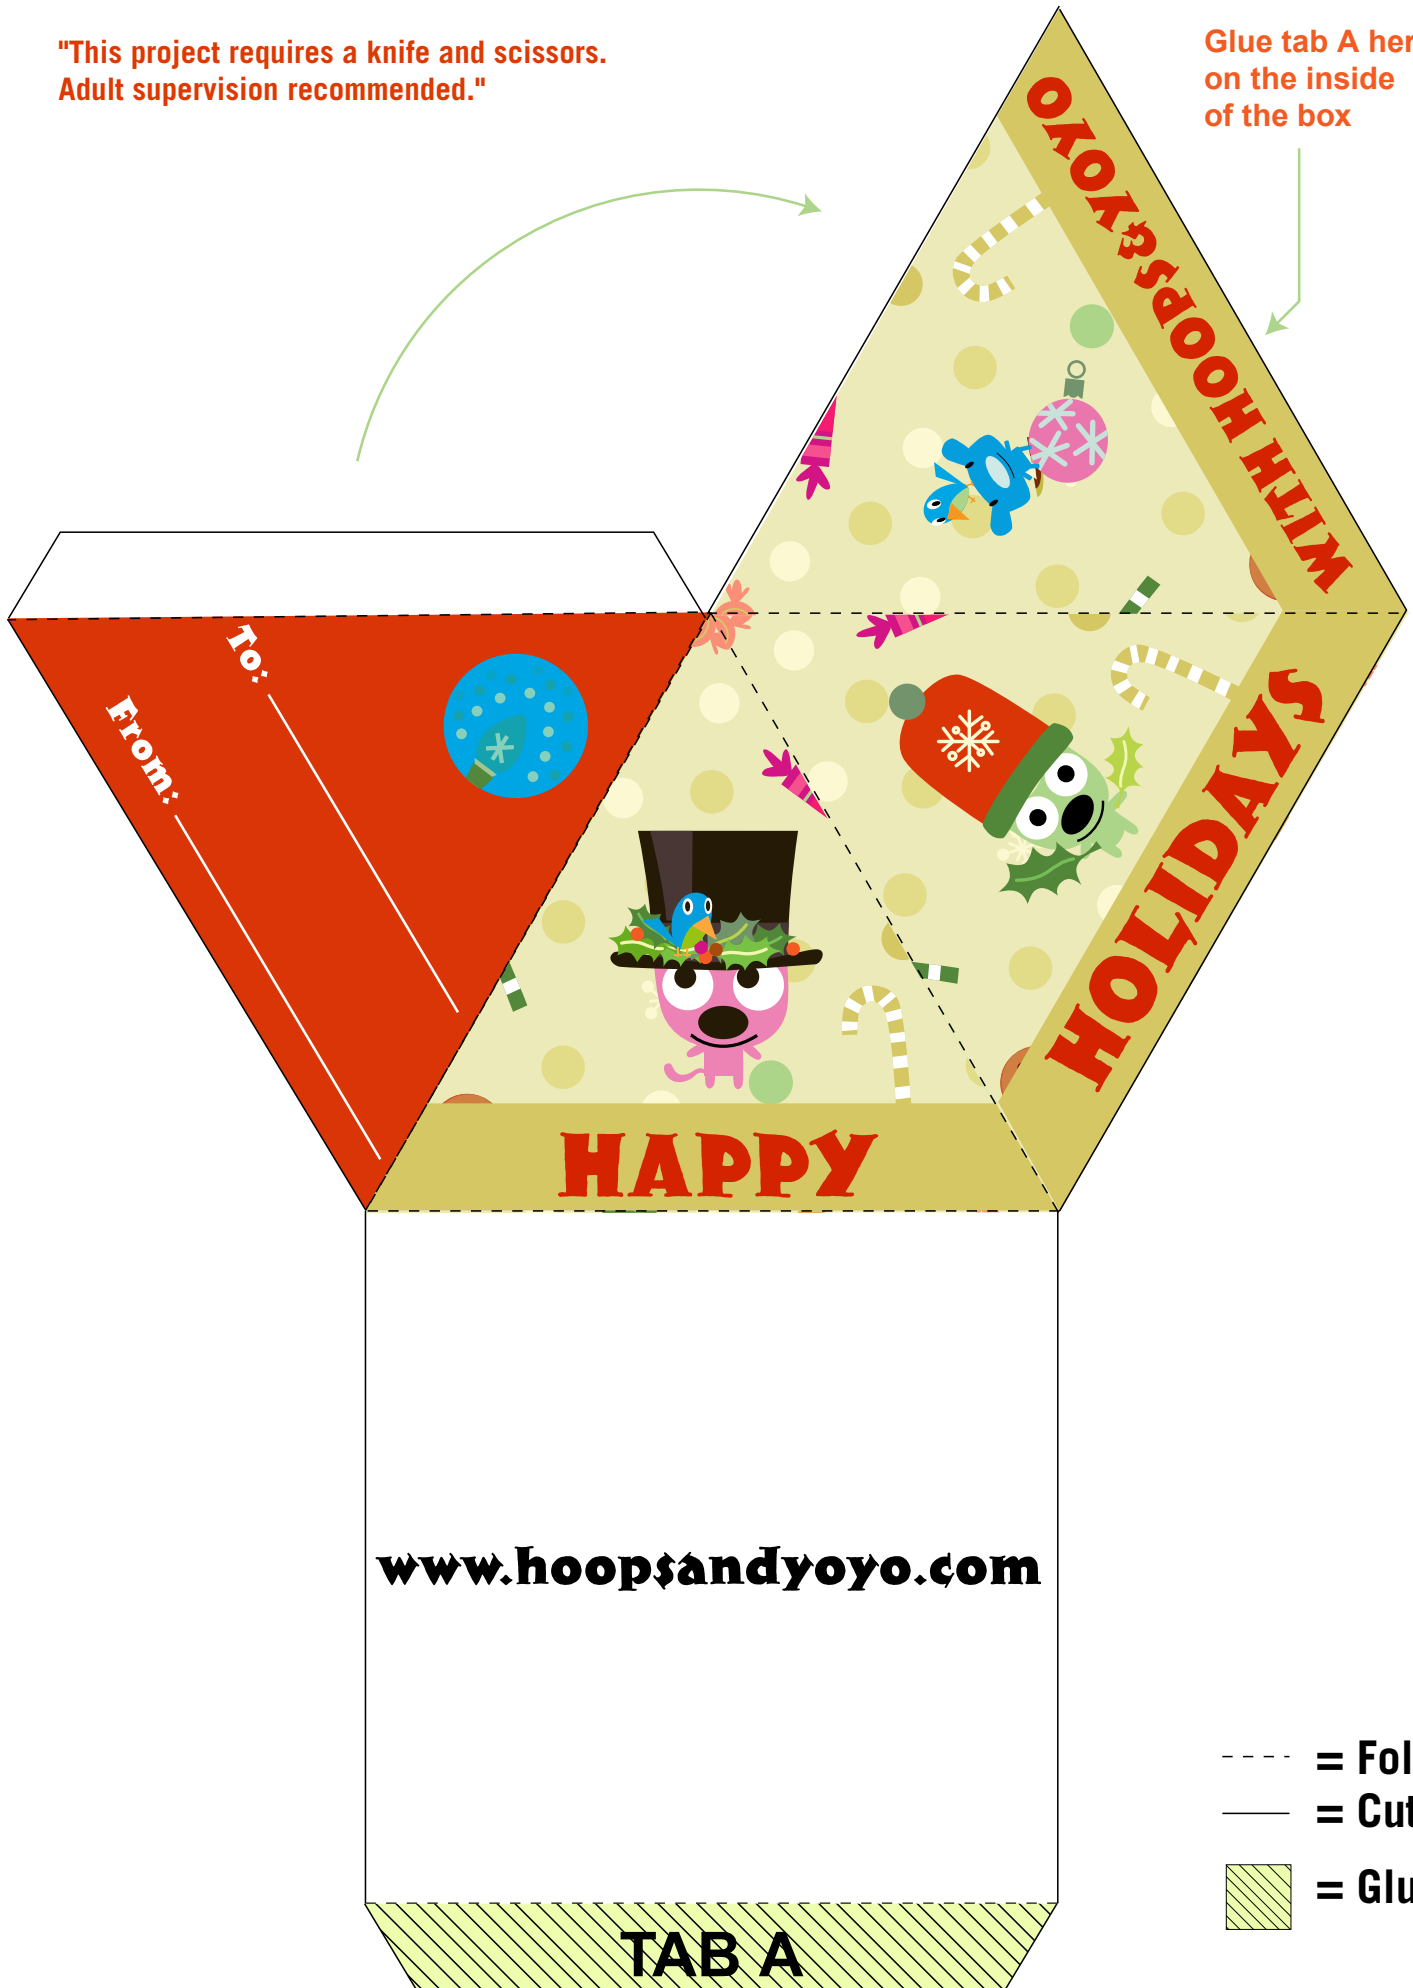

If your printer can handle card stock or heavier paper, your gift box will be much sturdier! Otherwise, you can print on regular paper and glue or mount your printout to card stock to make it stronger.

Be sure to fill in the "To" and "From" blanks before you start. It's much easier to do before the box is assembled!

"This project requires a knife and scissors.  
Adult supervision recommended."

Glue tab A here  
on the inside  
of the box
