

HOOPS & YOYO

holiday gift box

Instructions

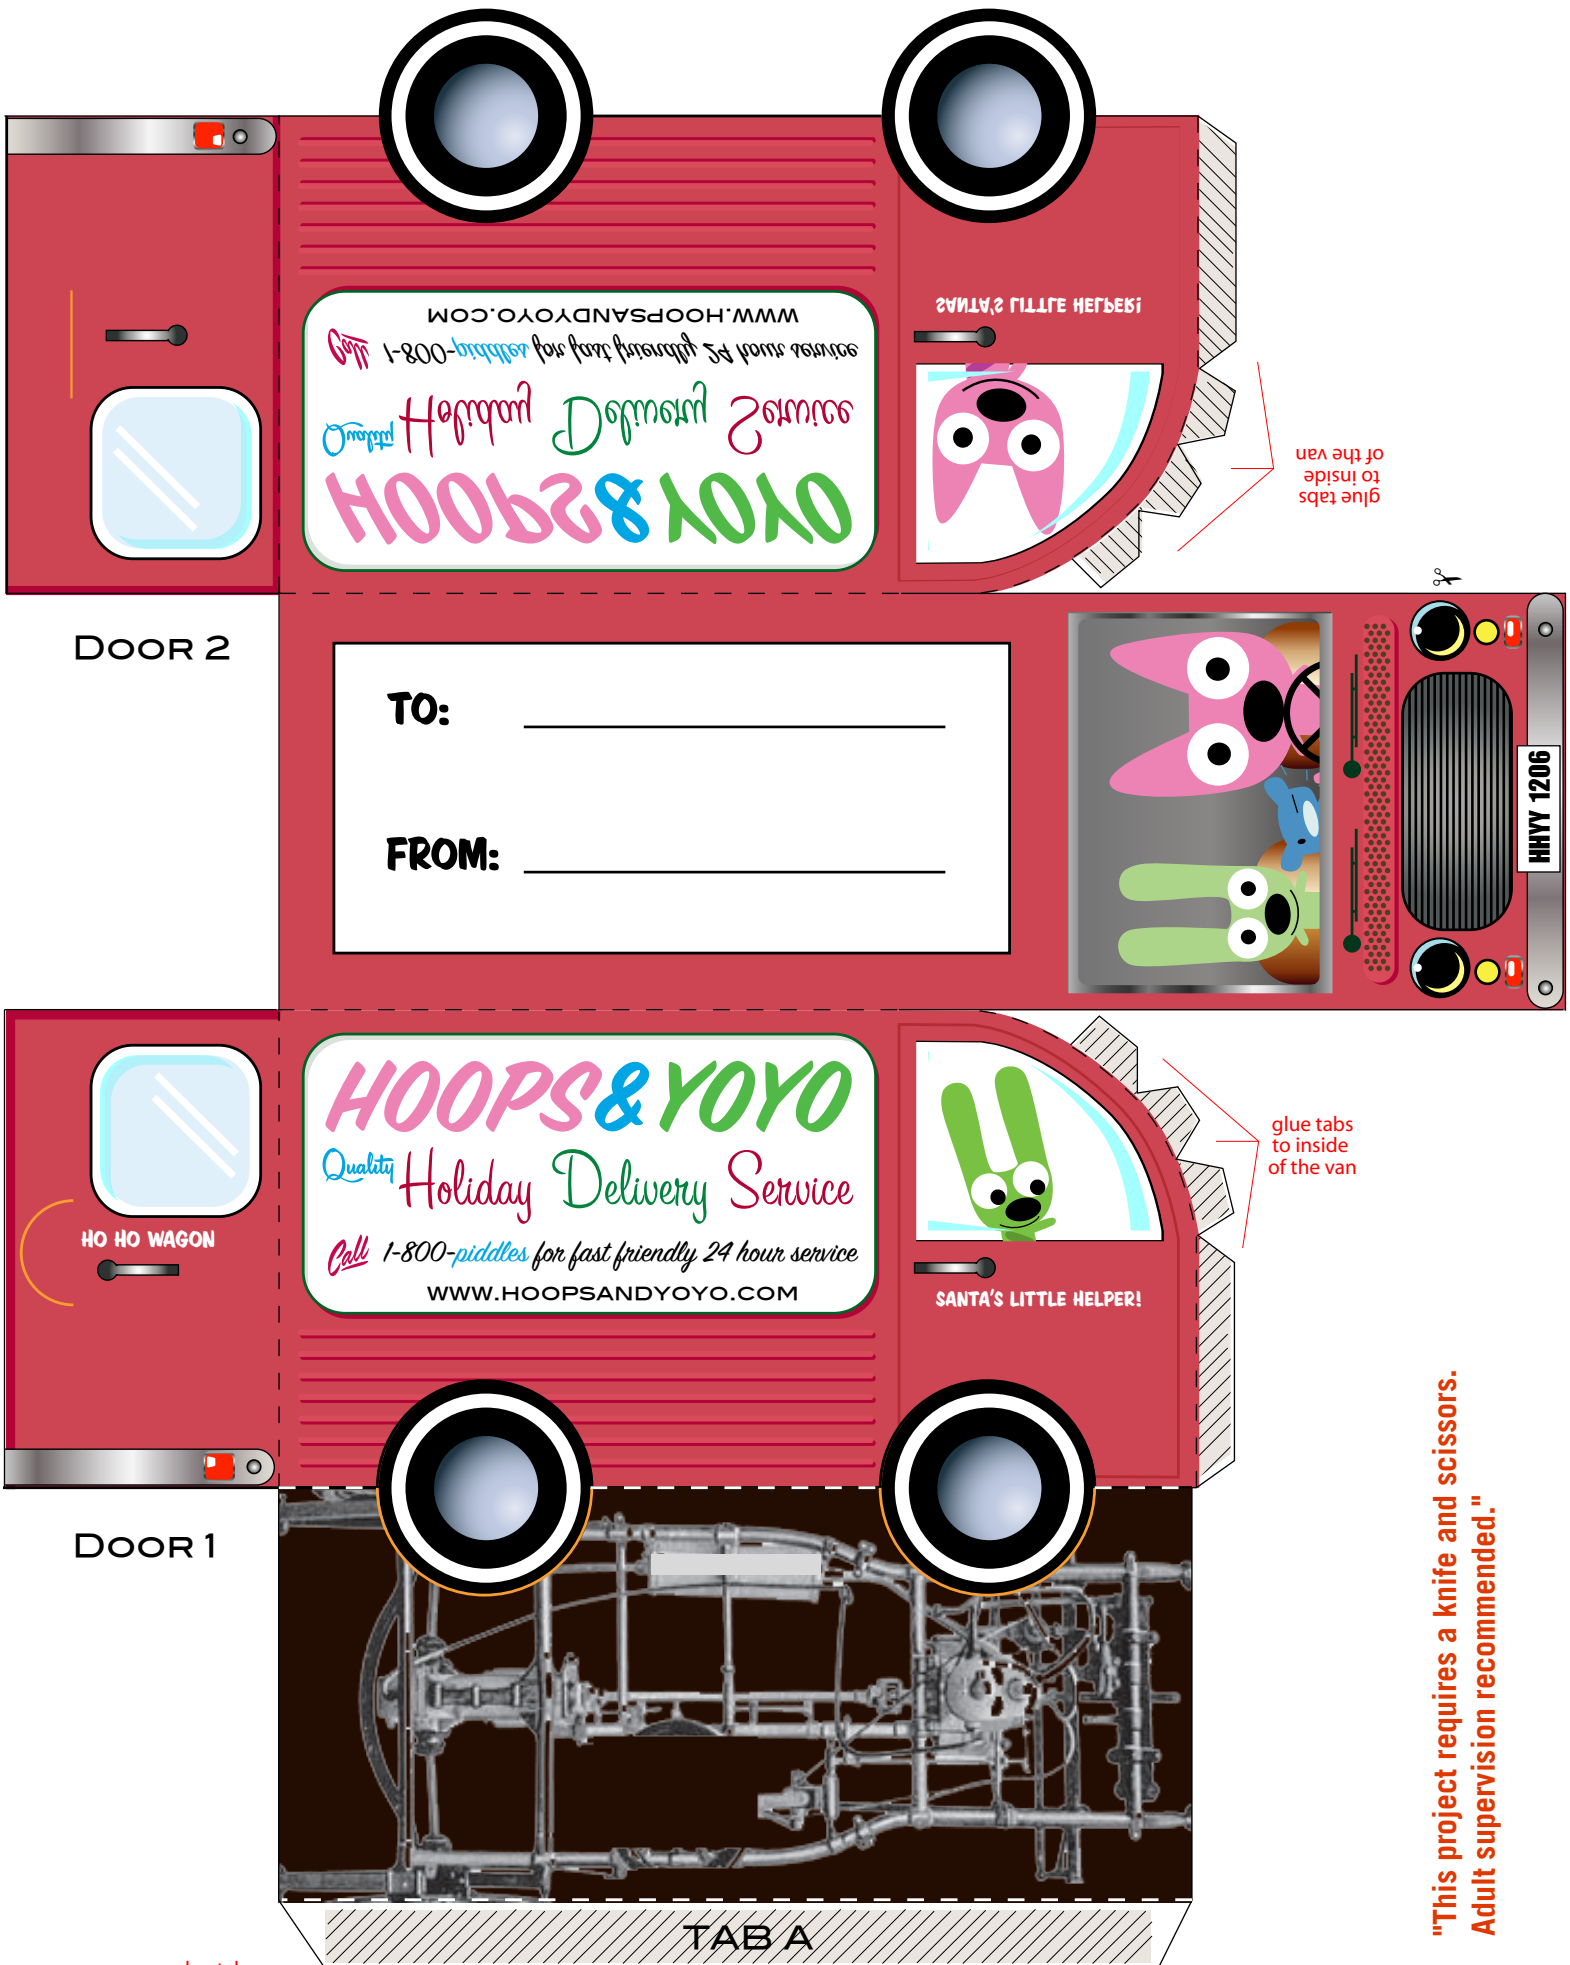

1. Print out van
2. Fill out the To and From sections.
3. Cut out van.
4. Pre-fold along dotted lines.
5. Open "Slit" areas (orange lines) with a sharp knife.
6. Glue or use two sided tape to attach the tabs to the inside of the van. Start with tab "A" so that the body of the van is assembled before the front is curved down to close.
7. insert the back door tab into the slot on the second door to close.

Tips

For best results use a heavier paper or card stock if your printer will accept heavier paper. You can also mount the print out to card stock using a spray adhesive or glue.

Be sure and fill out the "To" and "From" sections before assembly. It will be difficult to do this after the van is built.

This gift box is designed for small objects. Be careful of how much weight is placed in the box so that the wheels do not buckle under the weight. Depending on the paper stock you use, your gift box may be able to support more weight.
